# Rozdelenie výnimiek

# Try with resources

```
public class Resource implements AutoCloseable {  
    . . . . .  
}
```

```
try (Resource reader = new Resource( . . . . . )) {  
    . . . . .  
} catch ( . . . . . ) {  
    . . . . .  
}
```

# Try with resources

- rozhranie `AutoCloseable`
- `try with resources`
  - automatické uvoľnenie zdrojov  
napríklad zavretie súboru
  - netreba blok `finally`
